## DETAILED ACTION

### *Allowable Subject Matter*

Claims 2-8, 10-14, 16-29, 31-37, 39-43, 45-61 are allowed.

The following is an examiner's statement of reasons for allowance:

Randolph (US Pat. No. 5,616,111), shown in the figure below, discloses an exercise apparatus comprising a flat back support structure having a first frame attached to a flat sitting structure having a second frame, the back support structure and sitting structure together forming a body support structure, a padding structure attached to the back support structure, and an exercising structure attached to the body support structure comprising a first structure movably attached to a second structure, an attachment device and a resistance means.

Randolph does not teach a plurality of elongated members attached to the frame structures, padding attached to both sides of both frame structures, or a third frame structure.

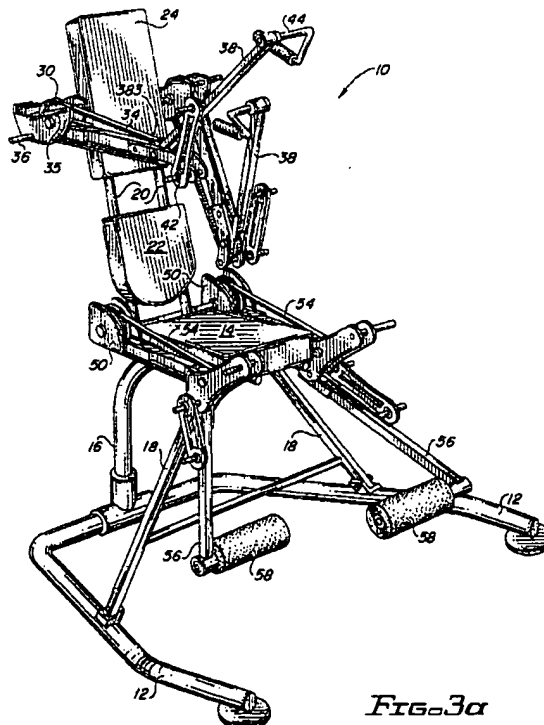

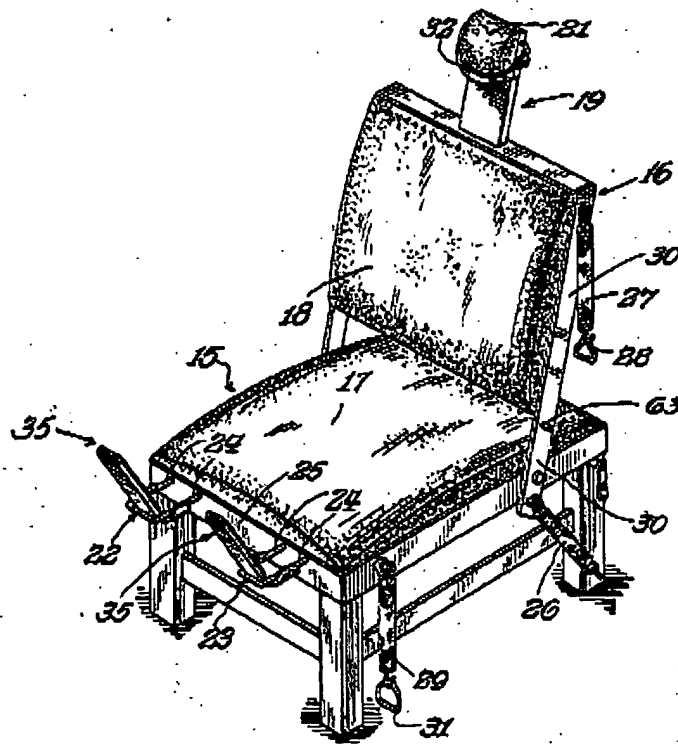

FIG. 3a

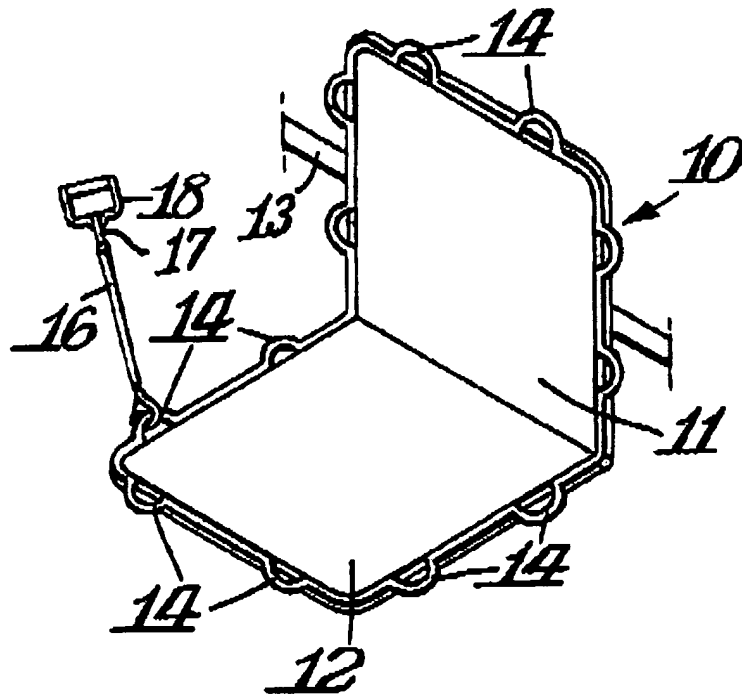

Chavin (US Pat. No. 1,973,945), shown in the figure below, discloses an exercising apparatus having a body support structure comprising flat back support structure on a first frame, a flat sitting structure mounted on a second frame, the sitting structure being pivotally attached to the back support structure, first and second elongated members attached to the first frame, third and fourth elongated members attached to the second frame, first padding structure attached to the flat back support structure, second padding structure attached to the flat sitting structure, and an exercising structure removably attached to the body support structure.

Chavin does not teach padded structures attached to the second side of the frames, armrest structures removably attached to the elongated members, or a third frame structure attached to the elongated members.

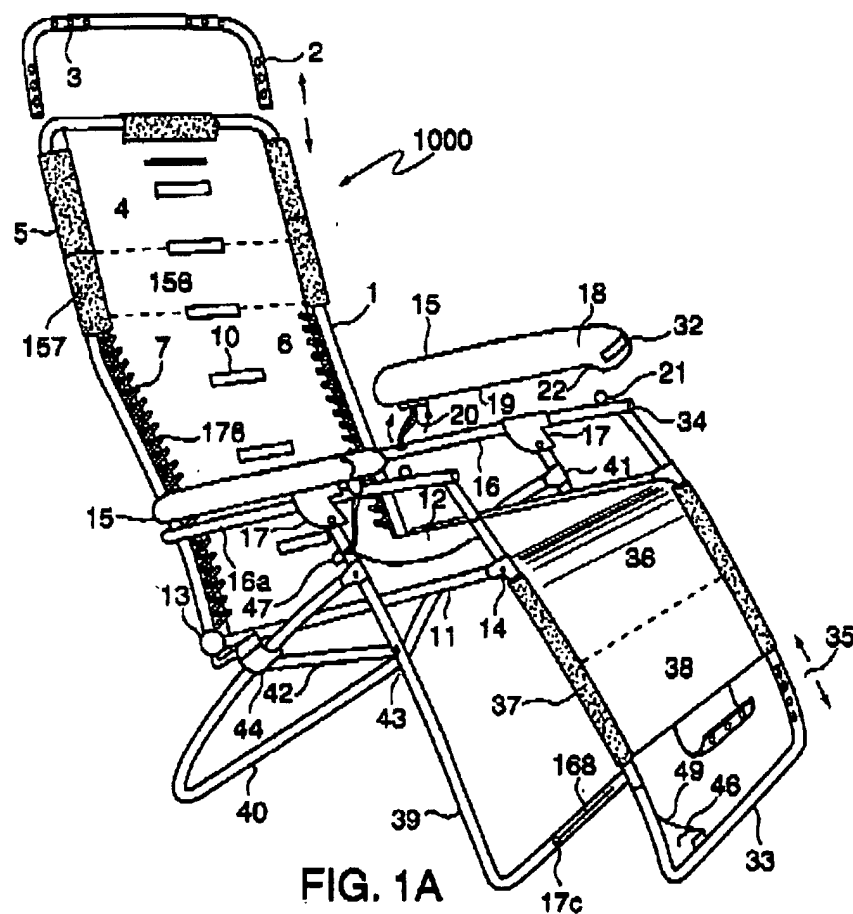

Rich (US Pat. No. 6,500,104), shown in the figure below, discloses a portable seat exercise device having a body support structure comprising a flat back support structure mounted on the first side of a first frame and a flat sitting structure mounted on the first side of a second frame, and an exercising structure removably attached to the body support structure.

Rich fails to disclose or provide motivation for elongated members attached to the frames, padded structures attached to the second side of the frames, or an exercising structure with a first structure movably attached to a second structure.

Lardieri et al. (US Pat. No. 6,755,463), shown in the figure below, discloses a portable chair having a body support structure comprising a back support structure composed of a first flat structure mounted on a first frame and a sitting structure composed of a second flat structure mounted on a second frame, elongated members attached to the first and second frames, as well as armrests attached to elongated members.

Lardieri fails to teach or provide motivation for padding attached to both sides of both frames, attachment of an exercising structure, or a third frame structure.

The prior art of record fails to teach or provide motivation for a portable exercise apparatus comprising a back support pivotally attached to a sitting structure, both the back support and sitting structures being substantially flat and having padding attached to both sides thereof, the back support and sitting structures having a plurality of elongated members attached thereto, with an exercising structure as claimed by Applicant that is removably attached to the device. Furthermore, the prior art of record does not teach or provide the motivation for removable armrest structures or a third frame structure in conjunction with the aforementioned back support structure, sitting structure, elongated members and exercising structure.

The method claims provide a method for the allowed apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
